### 1. Introduction

In the sprint number 1 we have created and executed a number of five test cases that covered the three user stories: WIR-1, WIR-2 and WIR-3. The purpose of these TC's was to verify the functionality of the facebook button, the ability of the logo to bring the user back to the presentation page, as well as the dynamism of the shopping cart button. After we executed the TC RAU-280, a bug was discovered.

### 2. In Scope

Nr crt	ID	TITLE
1.	WIR-1	Checking the functionality of 'Facebook' button on the "Blog" subpage of www.iiana.ro
2.	WIR-2	The main logo of the website is displayed and is functional
3.	WIR-3	The "Shopping cart" icon

### 3. Out of Scope

Nr crt	ID	TITLE
1.	WIR-4	The “Reduceri” section from the main menu
2.	WIR-5	Displaying the delivery options
3.	WIR-6	Search items field

### 4. Test Environments

The environment used for testing is **Production.**

### 5. Issues

ID	Title	Link to Jira Board
1.	WIR-7	<a href="https://ionescuanamaria.atlassian.net/browse/WIR-7">https://ionescuanamaria.atlassian.net/browse/WIR-7</a>
