1. Introduction

In the sprint number 2 we have created and executed a number of five test cases that covered the three user stories: WIR-4, WIR-5 and WIR-6. The purpose of these TC's was to verify the functionality of the discounted section, as well as the functionality of "search" field. We also have checked the correct display of the delivery partnerts,. When we have executed the test case RAU-280, a bug was discovered.
